

HEXcores

THE LIGHTWEIGHT DOOR WITH SOLID PERFORMANCE

COMMERCIAL & RESIDENTIAL DOORS & VENEERS

WHO WE ARE

HEXcores is a premium custom door manufacturer with over 30 years of experience crafting exceptionally lightweight, warp-free doors for high-end residential and commercial applications.

WHAT WE DO

Our doors solve problems others ignore. Heavy doors strain installers and hardware. Ours don't. We engineered away the weight but kept the substance. The result feels solid, exhibits meticulous craftsmanship, and installs with ease. One person can handle what once required three. That's meaningful innovation.

We design without compromise.

HIGH-PERFORMANCE CUSTOM DOORS

At the heart of every HEXcore door is our aluminum honeycomb core—lightweight, rigid, and precision-crafted for performance that lasts. Designed to reduce weight by an average of 40% without sacrificing strength or style, our doors offer unmatched durability, fire resistance, and warp-free reliability.

VERSATILE APPLICATIONS

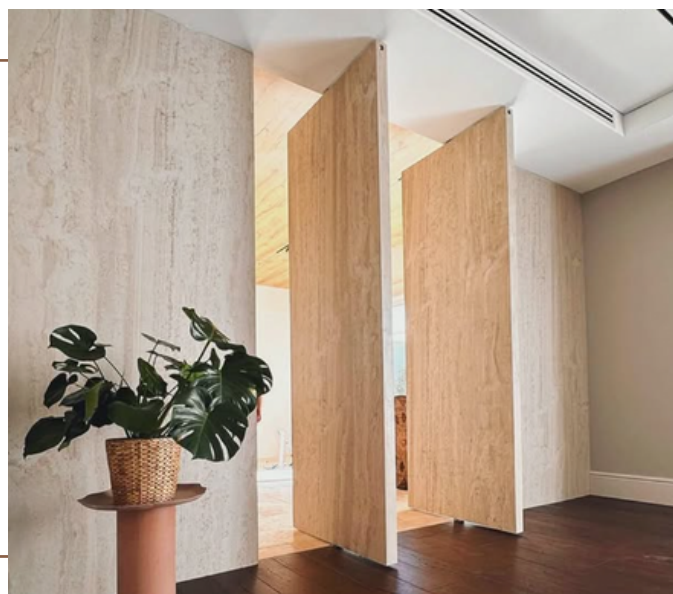

Custom-sized solutions for any environment—from interior doors to exterior applications with thick veneer options up to 3/4", suitable for oversized and pivot installations.

COMPLETE CUSTOMIZATION

- Any wood species with specialized treatments
- Exotic, charred, distressed, reclaimed, or wire-brushed finishes
- Glass, metal, or live edge inserts
- Recessed or built-in handles
- Available pre-finished or unfinished

Perfect for residential and commercial applications—all manufactured to your exact specifications.
